Photovoltaic modules can be installed on a building's roof, its façade or on the ground. During the initial survey, the installer will check the feasibility, taking into account: the available space required for the installation of the modules (for every 1,000 W of installed power, about 3-4 photovoltaic modules are necessary)

Installing a photovoltaic system: what do you need to know ...
If you decide to install a solar energy system, your installer should be able to help you complete the necessary permitting and steps. Your installer will determine the appropriate size for your system. The size will be based on your electricity needs (determined in step 4) as well as the following: The site's solar resource or available sunlight
