Of all of the misunderstood statistical issues, the one that 's perhaps the most problematic is the misuse of the concepts of correlation and causation. Correlation, as a statistical term, is the extent to which two numerical variables have a linear relationship (that is, a relationship that increases or decreases at a constant rate). Following are [...]

I'm giving this book a four star rating. It was a wonderful refresher for some topics in Psychology Statistics but just not enough for Graduate School. It was missing the topics of MANOVA, multivariate analysis of variance and MANCOVA, multivariate analysis of covariance. But overall, the coverage of topics was good.
