Race Are We So Different

RACE Are We So Different? looks at race in the United States through the eyes of history, science and lived experience. The program explains how human variation differs from race, when and why the idea of race was invented, and how race and racism affects everyday life. The program conveys three overall messages: Race is a recent human invention; Race is about culture, not biology; Race and ...

Race: Are We So Different? - Museum of Us

Members of different races usually have relatively minor differences in such morphology—a branch of biology dealing with the form and structure of animals and plants—and in genetics. All humans belong to the same species (*Homo sapiens*) and subspecies (*Homo sapiens sapiens*), but small genetic variations trigger varying physical appearances.

...

RACE: Are We So Different? challenges how we think about race and human variation, and reveals the reality - and unreality - of race. The exhibit uses interactive maps, historical artifacts, computer simulations of gene flows, compelling photographs and multimedia presentations to probe how racism has shaped our country's history and impacted every social institution in the United States.
