As such it was no surprise to me that he also was a pioneer of Extreme Programming. His paper on patterns and Extreme Programming at the first XP conference is one of my favorites.

Refactoring To Patterns - Martin Fowler and Form Template Method (345) are about introducing patterns into a system. As the essential Gang of Four book says, "Design Patterns...provide targets for your refactorings." There is a natural relation between patterns and refactorings. Patterns are where you want to be; refactorings are ways to get there from somewhere else.

Refactoring to Patterns suggests
that using patterns to improve an
existing design is better than

using patterns early in a new design. This is true whether code is years old or minutes old. We improve designs with patterns by applying sequences of low-level design transformations, known as refactorings. What Are the Goals of This Book?
