To get the best fuel efficiency, as well as power, the carburetor on your Honda engine needs to be adjusted to provide the optimum performance. Due to weather conditions and use, the carburetor adjustments can change, requiring them to be readjusted. Operating the Honda engine with the wrong adjustment settings can also cause damage to the engine.

fuel filter may be half plugged, or a tiny bit of dirt in the carb restricting the fuel at full throttle. take the bowl off the carb and rinse it and the carb needle with carb cleaner and change fuel filter first, before you try to return. I've found with small motors most problems are incurred with tainted gas.
