RESEARCH AND DEVELOPMENT IN INTELLIGENT SYSTEMS XXI. The papers in this volume are the refereed technical papers presented at AI-2004, the Twenty-fourth SGA International Conference on Innovative Techniques and Applications of Artificial Intelligence, held in Cambridge in December 2004. The papers in this volume present new and innovative developments in the field, divided into sections on AI Techniques I and II, CBR and

Secondly, as one of the earliest ITS research center in China, the Intelligent Transportation Systems Center, Wuhan University of Technology is also introduced. It was established in September, 2000, and aims to improve traffic safety, reduce vehicle ...

Research and Development of Intelligent Transportation ...

This is the thirtieth volume in the Research and Development in Intelligent Systems series, which also incorporates the twenty-first volume in the Applications and Innovations in Intelligent Systems series. These series are essential reading for those who wish to keep up to date with developments in this important field.

Research and Development in Intelligent Systems XXX on ...

This new research, which is published in Nature Machine Intelligence, defines the term Physical AI for the first time. It also suggests an approach for overcoming the gap in skills by integrating scientific disciplines to help future researchers create lifelike robots with capabilities associated with intelligent organisms, such as developing bodily control, autonomy and sensing at the same time.

Skills development in Physical AI could cultivate lifelike ...

This paper offers a comparative study of India and China in higher-education reforms for the development of talent in artificial intelligence (AI), and in AI research. It analyses the AI development plans and strategies of the two countries, their automation readiness index, talent retention, and research output. The analysis is based on both ...

Skills development in Physical AI could give birth to lifelike intelligent robots. New research suggests combining educational topics and research disciplines to help researchers breathe life into lifelike intelligent robots. The research suggests that teaching materials science, mechanical engineering, computer science, biology and chemistry as a combined discipline could help students ...

Research and Development in Intelligent Systems XXVIII ...

Development. of intelligence. There have been a number of approaches to the study of the development of intelligence. Psychometric theorists, for instance, have sought to understand how intelligence develops in terms of changes in intelligence factors and in various abilities in childhood. For example, the concept of mental age was popular during the first half of the 20th century.

The PreciousSmart cabin air filter system currently being developed by MANN+HUMMEL is an intelligent concept which sets new standards. Using an intelligent fresh air management, the system is able to save a considerable amount of energy and this in turn has a positive effect on the driving range of electric vehicles.
