Hayes C et al (2015) Medication errors in hospitals: a literature review of disruptions to nursing practice during medication administration.
Journal of Clinical Nursing, 24: 21-22, 3063-3076. Jennings BM et al (2011) The nurse's medication day. Qualitative Health Research; 21:
10, 1441-1451.

Skills for newly qualified nurses 3 ... - Nursing Times

Safety and medication administration are done with the purpose and goal of reducing or completely eradicating the problems of medication
errors that may in most cases lead to loss of lives. This critical role in the healthcare centers is conducted by professional, well trained and
qualified nurses.

Nurses Role in Safety and Medication Administration - Free ...

Safe and accurate medication administration is an important and potentially challenging nursing responsibility. Medication administration
requires good decision-making skills and clinical judgment, and the nurse is responsible for ensuring full understanding of medication
administration and its implications for patient safety. Medication errors have a substantial impact on health care in Canada (Butt, 2010). When
preparing and administering medication, and assessing patients after receiving ...

6.2 Safe Medication Administration – Clinical Procedures ...

the importance of considering patient safety – medication errors sadly do happen and place patients at risk, sometimes seriously; safe
administration of medicines is not only an important clinical issue, but is also important as a patient safety and safeguarding issue

Supporting medication administration | First Steps | RCN

Insert the syringe without the piston into the end of the nasogastric tube. Pour the medications into the syringe and allow them to flow with
gravity. Follow the administration with about 30 to 50 ml of water for an adult and 15 to 30 ml for children to clear the tube and to maintain its
patency.

Advisory guidance on administration of medicines by nursing associates - Health Education England (HEE) guidance Alongside this guidance, most local NHS trusts and other employers will also have their own guidance on safe and effective medicines handling, which employees should always check and follow when considering their actions.

Standards for medicines management - Nursing and Midwifery ...

Prescribed medication is the most frequent treatment provided to patients in the NHS. The five rights of safe and effective medication management are clearly defined in law as: the right medicine is given to the right patient at the right time, in the right form of the drug and at the right dose. All professionals who are involved in medicine management are governed by a legal and professional accountability to follow best practice when prescribing and administering medication.

Improving practice and patient safety through a medication ...

Nurses are primarily responsible for safe medication administration. Nurses draw from their foundational knowledge of patient conditions and organisational processes and use clinical reasoning that supports safe medication practice. There was minimal evidence clearly articulating nurses' clinical reasoning used to support medication safety.

Nurses' clinical reasoning practices that support safe ...

Dougherty L, Lister S (2015) The Royal Marsden Manual of Clinical Nursing Procedures. Wiley-Blackwell. Keers RN et al (2013) Causes of medication administration errors in hospitals: a systematic review of quantitative and qualitative evidence. Drug Safety; 36: 11, 1045-1067.
