STAT 528 is that ECE 645 is tailored to signal processing whereas STAT 528 is a general introduction of statistics. As compared to ECE 662, ECE 645 emphasizes more on signal detection and parameter estimation, which is typically not discussed in ECE 662. 4. What is the course pace? My teaching pace is fast. Weak signal detection is a significant problem in modern detection such as mechanical fault diagnosis. The uniqueness of chaos and good learning ability of neural networks provide new ideas and framework for weak signal detection field. In this paper, Elman neural network is applied to detect and recover weak pulse signal in chaotic noise. For detection problem of weak pulse signal under ...
