Delivering over SIP

Read Free Sip Beyond Voip

enables businesses to benefit from investment in large data connections as, using SIP, they also enable voice to be delivered over the internet (VoIP).

What is VoIP? VoIP or Voice over Internet Protocol, is a term that refers to the transfer of voice

over the Internet,
rather than a
traditional phone
line. VoIP however,
differently to SIP, is
only able to initiate
voice
communications,
not multimedia too.

Understanding The
Differences
Between SIP vs.
