Patent has presented both sides to many research questions, making it easier for students to see the difficulties and complexities in the arguments of what constitutes intelligence. A comparable title is Russell Freedman and James Morriss' *The Brains of Animals and Man* (Holiday, 1972), while further exploration of animal language is possible in ...

How Smart Are Animals?: Patent, Dorothy Hinshaw ...

As a child, my favorite activity was exploring nature, especially finding animals like frogs, toads, and lizards. I kept tropical fish, had a dog, and loved riding horses. My love of animals led to a Ph.D. degree from U.C. Berkley in Zoology. In grad school I met and married fellow student Greg Patent.

How Smart Are Animals? by Dorothy Hinshaw Patent

Dorothy Hinshaw Patent (b. 1 940) was born in Minnesota. As a child, Patent loved animals and being outdoors, spending much of her time exploring the woods near her home. Her love of animals led her to study animals when she went to college. After college, Patent worked as a scientist for several years. Then she decided to start
