~~Space-based solar power plants could soon be a thing~~  
China, as a part of its ambitions project, is eying to come up with a solar power plant in space by 2028. The target year for launching a solar power plant in space is two years ahead of its ...

~~China Plans to Build Solar Power Plant in Space By 2028~~  
A research team at Xidian University in China announced it has successfully tested technology that would enable a space-based solar power plant that could ...

~~China Group Announces Successful Test of Space-Based Solar Power~~  
Summit Corporation Limited, one of the largest business conglomerates in the country, is planning to build a 40MW-50MW floating solar plant on the lands of the Barapukuria Coal Mine Company Limited, ...

~~Summit plans 50MW floating solar plant on Barapukuria submerged lands~~  
China's built a 246-foot tower could unleash the power of geostationary satellites harvesting solar power 24/7 using high-frequency microwave beams.

~~China built a 246-foot tower to test an emerging solar power system~~  
China plans to launch a satellite that would convert solar energy into electricity and then convert that into microwave or lasers that can then be transmitted to various fixed targets on Earth.

~~China wants to build a space-based solar power plant that will beam energy back to Earth~~  
New proposals for solar farms around the state are raising conflicts over land-use regulations and sensitive wildlife species as the push for more clean energy continues.

~~Conflicts escalate amid surge in WA solar farm proposals~~  
Conventional wisdom suggests it's liberals who most want renewable energy. But polling shows conservatives like it too, and some are taking action.

~~Red voters for green energy? Conservatives say they support solar and wind power too~~  
Columbus' recent power outages are a 'stark reminder' of why our energy system must be diversified, starting with community solar, Tristan Rader says.

~~ASP monopoly out of our control — Community solar gives power back to customers — Opinion~~  
The Tamil Nadu Generation and Distribution Company (TANGEDCO) is in the process of producing 20000 MW of solar power in the state in 10 years' time to reduce the dependence on coal-based power plants.

~~TANGEDCO to set up solar power plants across TN~~  
Also on the rise: \$27 million in land lease payments for two solar facilities on public land. Strategy announced for preventing the importation of goods mined or produced using forced labor from the ...
