The Maths of General Relativity (1/8) - Spacetime and Worldlines General Relativity Explained simply \u0026 visually *Space Time And Geometry*

To understand the dynamics of spacetime geometry it is not enough, we know, to listen to Einstein's 1915 and still-standard classical theory, reciting from the pulpit the standard classical creed.

Gravitation and Inertia

Riemannian geometry ("which allows spaces to be arbitrarily curved and studied from the inside, rather than requiring them to be embedded in some higher-dimensional space"), and matrix algebra ...

The Biggest Ideas in the Universe: Space, Time, and Motion

What is there in the center of a Black Hole? This question is inextricably connected with another one: where did Big Bang come from?

Part 7 - Relativity of Death: Ein Sof – is the only singularity

Sci-fi sensation Everything Everywhere All at Once pivots on the idea of being able to put "everything" on a bagel. We examine the scientific and philosophical questions this could raise.

The forms of the rugs are rather organic, inspired by the ancient geometry of India, the cosmos and the architecture ... Precise gultarashi moulds the rug pile like troughs and crests of space-time, ...

When traditional art of carpet-making meets cosmos curiosity

Said Plucinsky: "The geometry of these materials is tuned somewhat arbitrarily. So we need rules about how you might choose the architectures that you're going to fabricate. Once you have those ...

New kirigami-inspired models predict how new metamaterials behave

Before we arrive at these new findings, we'll need to chart the history of two important concepts: aperiodic geometry and twistrionics. Aperiodic geometry means patterns that don't repeat.

New, highly tunable composite materials--with a twist

There are various factors that influence how sound behaves like the geometry of a room, what's in said room, and how far someone is from a source. To achieve this, Meta's plan is to use AR ...
