Standards for Relationship Testing Laboratories - Result

DNA labs typically deal with unusual cases, complex relationships, and testing of remains rather than just maternity and paternity cases. Because of this, their training in calculations would need to be extensive. Forensics labs deal with far fewer relationship cases than a Relationship Testing lab. Their

Response to Comments - Standards for Relationship Testing ...

The 10th edition of Standards for Relationship Testing Laboratories (RT Standards) features new and revised requirements in areas such as personnel responsibilities, first-time accreditation, the use of autosomal markers, testing of backup systems and corrective action.
