Idle Stop-Start Diagnostics What happens if a Stop-Start
system quits working? In most cases, the system self-
diagnostics will detect the fault, set one or more trouble codes
and disable the Stop-Start system. It may also disconnect
and isolate the hybrid battery if there is any indication of a
short circuit.

Idle Stop-Start Systems - AA1Car.com

This is the second post in a series about authoring custom profiles for Windows Performance Recorder (WPR). In the previous post, we introduced a simple custom profile that collects events from a single provider. If you are only interested in the events from your module, that profile would be sufficient.

Authoring Custom Profiles – Part 2 | Performance and ...

If the inner basket is not turning go to manual diagnostic mode: Motor. C9. The inner wash basket should coast to a stop. If the basket does not stop spinning within 5 seconds press the stop button on the washer's control and restart the test. (None) End Of Test. Cycle Signal Beeps. If no beep is heard verify that the cycle signal is on.
