Vector Mechanics for Engineers: Statics Edition, 4 - 17. Sample Problem 4.6. A man raises a 10 kg joist, of length 4 m, by pulling on a rope. Find the tension in the rope and the reaction at . A. SOLUTION: • Create a free-body diagram of the joist. Note that the joist is a 3 force body acted upon by the rope, its weight, and the reaction at . A.

This free online statics course teaches how to assess and solve 2D and 3D statically determinate problems. The course consists of 73 tutorials which cover the material of a typical statics course (mechanics I) at the university level or AP physics. In order to gain a comprehensive understanding of the subject, you should start at the top and work your way down the list.

In this practice problem, the vectors are rigged so that the alternate solution is easier than the default solution. The graphical method for addition of vectors requires placing them head to tail. The sum would be the resultant vector connecting the tail of the first vector to the head of the last.
