I was born in Jaffna, Sri Lanka and had my early education in Sri Lanka. Having spent my entire school career at St. Johns College, Jaffna, I attended the University of Peradeniya, Sri Lanka briefly ...

Professor Visakan Kadirkamanathan

Actuarial science is the discipline that applies mathematics and statistical methods to assess risk in the insurance and finance industries. Actuarial science includes a number of interrelating ...

Actuarial Science Minor

Topics covered include classical methods for linear systems, eigenvalues, interpolation and integration, ODEs and data fitting, and also more modern ideas like adaptivity and stochastic differential ...

Numerical Analysis for Engineers and Scientists

Trajkovic - data communications (collection, characterization and modelling of traffic in high speed networks), computer aided design tools (novel algorithms for simulation of transistor circuits); ...

Schwarz methods use a decomposition of the computational domain into subdomains and need to impose boundary conditions on the subdomain boundaries. In domain truncation one restricts the unbounded ...

Schwarz methods by domain truncation

We investigate the consequences of a peaceful shift of power from one social group to another. Theoretically, we show that an individual's decision to stay put or migrate depends on the difference ...
