Newton's Laws of Motion - 8TH

Read Book Study Guide 8th Grade Newtons Laws

GRADE SCIENCE. Newton's first law states that every object will remain at rest or in uniform motion in a straight line unless compelled to change its state by the action of an external force. This is normally taken as the definition of inertia. The second law explains how the velocity of an object changes when it is subjected to an external force.

Newton 1st Law of Motion: An object at rest tends to stay at rest and a moving object will continue moving in a straight line with a constant speed: Newton 2nd Law of Motion: An object acted upon by a force will accelerate in the direction of the force; acceleration = net force divided by mass.
