This article covers the History of Sulzer diesel engines from 1898 to 1997. Sulzer Brothers foundry was established in Winterthur, Switzerland, in 1834 by Johann Jakob Sulzer-Neuffert and his two sons, Johann Jakob and Salomon. Products included cast iron, firefighting pumps and textile machinery. Co-operation with Rudolf Diesel led to the construction of the first Sulzer diesel engine in 1898. In 2015, the Sulzer company lives on but it no longer manufactures diesel engines, having sold the die

**History of Sulzer diesel engines—Wikipedia**

The Sulzer engine in diesel traction A potted and incomplete history 1912 - 1990. The earliest diesel engined rail vehicle dated from about 1894, the result of William Priestman marrying a 30 bhp two-cylinder vertical engine to a very rudimentary four wheeled rail vehicle. From this development during the latter half of the 1890's and into the first decade of the 20th century other manufacturers produced a variety of small diesel & petrol engined vehicles.

**sulzer engine 6LDA28-LVA24**

Sulzer developed a series of rail traction engines in the 1930s and 1940s which were used extensively in diesel locomotives in the UK, Europe and South America. A small number were used in locomotives in Africa and Australia. The Sulzer LDA (prefixed by the number of cylinders, and with a suffix related to the cylinder bore) engine was widely used by British Rail and Romanian Railways.

The RTA72U is a single-acting, low-speed, two-stroke reversible marine diesel engine manufactured by New Sulzer Diesel Ltd. It is one of the RTA series engines which were introduced in 1981 and in addition to a longer stroke than the earlier RL series, it has a cylinder-head exhaust valve providing uniflow scavenging.

The Wärtsilä RT-flex96C is a two-stroke turbocharged low-speed diesel engine designed by the Finnish manufacturer Wärtsilä.It is designed for large container ships that run on heavy fuel oil.Its largest 14-cylinder version is 13.5 metres (44 ft) high, 26.59 m (87 ft) long, weighs over 2,300 tons, and produces 80,080 kW (107,390 hp).The engine is the largest reciprocating engine in the world.

Sulzer Brothers History & Production Details For Rail Traction This page last updated June 10th 2008 - updates for the Faur built 6LDA28 powered locomotives. For what its worth this is my atempt at trying to produce a list, by country, of diesel locomotives and railcars powered by Sulzer engines.

**sulzer locomotive production: sulzer engine**

The famous marine engines which were widely used as a ship propulsion plant are as follows: SULZER. RD series. It is the oldest engine series from SULZER and very rarely seen in shipping industry today.It is equipped with rotary exhaust valves and fuel valve with short spindle. The cylinder liner quills were of wet type and placed only at the upper part. It has pulse turbo charging system with no auxiliary blower fitted for supporting the scavenge pressure.

With the development of groundbreaking new steam engines | the first Sulzer steam engine left the workshop in 1854 | he is instrumental for the early successes and the growth of the company. Charles Brown's expertise as an inventor and engineer and Johann Jakob Sulzer-Hirzel's talents as an entrepreneur and salesman proved a winning combination over a period of two decades.

**10th century - Sulzer**

Sulzer has developed technical and practicable solutions for carrying out complete or partial stator rewinds, as well as repairs of generation and bow thruster units on board a ship. We offer a wide range of services available worldwide!we promptly mobilize our experts no matter where your ship is located.

Sulzer engine parts. Active in both four-stroke and two-stroke design sectors, Sulzer's links with diesel engine date back to 1879 when Rudolf Diesel, as a young engineer, followed up his studies by working as an unpaid workshop trainee at Sulzer Brothers in Winterthur, Switzerland. The first Sulzer-built diesel engine was started in June 1898. In 1905 the company built the first directly reviseible two-stroke marine diesel engine and , five years later, introduced a valveless two-stroke ...

Sulzer is a global leader in fluid engineering. We specialize in pumping, agitation, mixing, separation and application technologies for fluids of all types.

**Because life is fluid—Flow control and applications - Sulzer**

The diesel engine is of Swiss design but was built by Vickers Ltd at Barrow-in-Furness under a licence agreement with Sulzer Brothers. The engine has six cylinders and develops 1160hp. It was directly coupled to the electric generators, which produced a direct-current electrical supply to the motors mounted on the locomotive bogies.

**Sulzer diesel engine - Science Museum Group Collection**

Sulzer was a famous name for Diesel engines in ships, power plants, and railways around the world. 1930's Airless fuel injection became standard from 1930 in all engine types, greatly improving their efficiency and reducing their maintenance requirements.

**WinGD—WinGD Engine History**

Sulzer brand was founded by Salomon Sulzer-Bernet in 1775 and in 1834 established as Sulzer Brothers Ltd. (Gebrüder Sulzer). The headquarters was located in Winterthur, Switzerland. Their first diesel engine, built in 1898, was a vertical four-stroke engine with blast-air fuel injection.
