New member added to carbon material family, a two-dimensional monolayer polymeric fullerene

An international research collaboration between Kobe University and Inner Mongolia Medical University has developed a simple, low cost and comparatively environmentally friendly method of synthesizing ...

New eco-friendly synthesis method uses alumina as a recyclable catalyst

Kuraray signed a capacity reservation agreement with Origin Materials to purchase sustainable, carbon negative intermediate chemicals used in the large-scale synthesis of many polymers ...

Origin Materials and Kuraray Announce Carbon Negative Materials Partnership

This volume collects an impressive amount of information about many of the
