in Math! Terrestrial Planets Guided And Study

Terrestrial planets (Earth sized and smaller) are rocky worlds, composed of rock, silicate, water and/or carbon. To determine if some of these worlds have atmospheres, oceans or other signs of habitability, it takes more investigation. Larger terrestrial exoplanets (those at least twice as massive as Earth) are classified as super-Earths.

Terrestrial | Planet Types - Exoplanet Exploration ...

Mercury has extreme temperatures from -173°C to higher than 427°C . Earth
