The term 'developmental state' has been incorrectly used to describe any state presiding over a period of economic development and improvement in living standards. This essay describes the attributes of the 'developmental state' and explains how they led to highly successful economic development in the Newly Industrialized Countries (NICs).

The 'Developmental State' and Economic Development

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.
