The modern theories of inflation are in fact the blend of classical and Keynesian theories of inflation. The classical theory

laid emphasis on the role of money, i.e., the price rises in proportion to the ent supply of money, and ignored the nonmonetary factors affecting inflation. While, the Keynesian theory laid emphasis on the non-monetary factors, i.e. aggregate demand in the real terms and ignored the Page 17/33

effect of monetary expansion (money supply) on the price level.

In physical oyment cosmology, cosmic inflation, cosmological inflation, or just inflation, is a theory of exponential expansion of space in the early universe. The inflationary epoch lasted from 10 236 seconds after the Page 22/33

conjectured Big Bang singularity to some time between 10 ?33 and 10 ?32 seconds after the singularity. Following the inflationary period, the universe continued to expand, but at a slower rate.

... Keynes' argument is based on the idea that the level of employment is not determined by the price of labour, but by the spending of

money. It gave way to an entirely new approach where employment, inflation and the market economy are concerned.
