The global financial crisis (GFC) refers to the period of extreme stress in global financial markets and banking systems between mid 2007 and early 2009. During the GFC, a downturn in the US housing market was a catalyst for a financial crisis that spread from the United States to the rest of the world through linkages in the global financial system.

Explainer | Education | RBA - Reserve Bank of Australia

The TED spread spiked up in July 2007, remained volatile for a year, then spiked even higher in September 2008, reaching a record 4.65% on October 10, 2008. The financial crisis of 2007-2008, also known as the global financial crisis (GFC), was a severe worldwide financial crisis.

Financial crisis of 2007-2008

Financial crisis of 2007-08, severe contraction of liquidity in global financial markets that originated in the United States as a result of the collapse of the U.S. housing market. It precipitated the Great Recession (2007-09), the worst economic downturn in the United States since the Great Depression.

Financial crisis of 2007-08 | Definition, Causes, Effects -

The global financial crisis refers to a widespread economic emergency that began in 2007. Beginning with the crash of the United States financial system, the crisis quickly spread worldwide, thanks to the interconnected markets of modern global trading systems. It is still impossible to fully explain the effects of the global financial crisis, as the disaster continues to damage and impede markets worldwide even several years after the initial event.

What is the Global Financial Crisis? - wiseGEEK

The financial crisis - 10 years on - Bank of England
As part of a major new series, the Financial Times has compiled chronological chapters of the crisis using information drawn from around the world. Individually, each tells a small yet important part of the story. Collectively, they help explain the virus's enormous death toll - and why its impact will last for years to come.

The financial crisis - 10 years on - Bank of England

The global financial crisis (GFC) refers to the period of extreme stress in global financial markets and banking systems between mid 2007 and early 2009.

Explainer: The Global Financial Crisis

The financial crisis was primarily caused by deregulation in the financial industry. That permitted banks to engage in hedge fund trading with derivatives. Banks then demanded more mortgages to support the profitable sale of these derivatives. They created interest-only loans that became affordable to subprime borrowers.

What Caused 2008 Global Financial Crisis

As part of a major new series, the Financial Times has compiled chronological chapters of the crisis using information drawn from around the world. Individually, each tells a small yet important part of the story. Collectively, they help explain the virus's enormous death toll - and why its impact will last for years to come.

A Global Debt Crisis Is Coming and the Next Administration -

Many of us still remember the collapse of the U.S. housing market in 2006 and the ensuing financial crisis that wreaked havoc on the U.S. and around the world. Financial crises are, unfortunately, quite common in history and often cause economic tsunamis in affected economies.

5 of the World's Most Devastating Financial Crises -

During a global financial crisis, financial institutions lose faith and stop lending to each other and traders stop buying financial instruments. Eventually, most lending stops and businesses suffer significantly. In most global financial crises, parties to financial contracts in many countries fear that their counterparties will not honor them.

Global financial crisis - definition and meaning - Market -

The 2008 financial crisis was the worst economic disaster since the Great Depression of 1929. It occurred despite the efforts of the Federal Reserve and U.S. Department of the Treasury. The crisis led to the Great Recession, where housing prices dropped more than the price plunge during the Great Depression.

2008 Financial Crisis: Causes, Costs, Could It Recour

Susan Lund: The epicenter of the global financial crisis was really the housing market. It started in the United States, but it turned out that similar housing bubbles were building in other countries, like the UK, Spain, and Ireland. Households were borrowing more than they could afford.
