The text is a wonderful and detailed exposition of the physics and mathematics of image acquisition and processing. This book has undergone five printings within the second edition, each successive printing correcting several errors, many quite serious. The current printing is the fifth, is softcover, and has ISBN 9781942675082.

The Handbook of Astronomical Image Processing: Berry ...

This was distributed on a CD in the back of the book Handbook of Astronomical Image processing by Berry and Burnell. The book has been out of print for some time and as a result the software has no longer been available. I have recently received the following message from Richard which explains the current situation.

News about AIP4WIN | British Astronomical Association

The Handbook of Astronomical Image Processing is a valuable and authoritative reference work on image processing. The Handbook covers all aspects of image processing at the fundamental level of a reference work you will consult for years to come. Detailed chapter cover fundamental topics:
