The Law of Kinship: Anthropology,

Psychoanalysis, and the Family in France is

divided into three parts and organized

chronologically. In order to illustrate the

intersection of political and

intellectual/cultural history, Robcis

examines the notion of familialism and its

evolution in the realm of the law, as well as

the intellectual underpinnings of these

debates and laws.

Levi-Strauss and Lacan constructed the heterosexual family as a universal trope for social and psychic integration, and this understanding of the family at the root of intersubjectivity coincided with the role that the family has played in modern French law and public policy. The Law of Kinship contributes to larger conversations about the particularities of French political culture, the nature of sexual difference, and the problem of reading and interpretation in intellectual history.

The book goes on to demonstrate how this vision of kinship resonates with both the 1804 Napoleonic Code and the 1938 Family Code, the two prime examples of French political familialism, in that these texts elevate the heterosexual family as the best means to organise solidarity and build political consensus.

Law of Kinship: Anthropology, Psychoanalysis and the ...

Kinship has traditionally been one of the key topics in social and cultural anthropology. There are two principal reasons for this: First, although not all human groups are constituted on the basis of kinship, all humans have kinship as individuals and are related to other individuals through it.
