The 1290 Infinity II LC System is an ultra-high performance LC that has market-leading sample capacity and is designed for the lowest dispersion for the most challenging ultra-HPLC experiments. The 1290 Infinity II LC system is designed to be both a HPLC and high-end UHPLC system in a single flow path, giving you robust and excellent performance no matter what application you are running while seamlessly integrating into your existing laboratory environment.

UHPLC, Agilent 1290 Infinity II LC System | Agilent

The 1290 Infinity II Preparative LC System is designed for the purification laboratory that needs increased daily throughput by offering automated sample injection and fraction collection, smooth control of LC valves, and flexible access to up to four analytical columns and six preparative columns. Easily exchangeable pump heads enable delivery of flow rates of up to 200 mL/min, making the system ideally suited for both analytical scouting columns and preparative columns with internal ...
