## The Promise Of Robotics Process Automation In The P2p Space

---

### *The Promise Of Robotics Process*

We know robotic process automation (RPA) is driving an automation renaissance all over the globe—Forrester predicts that more than 4 million robots will be in production by 2021, and we're seeing the rise of a next-generation RPA platform that includes technologies like business process management, artificial intelligence, process mining and cognitive document automation (including OCR technology) for a complete end-to-end digital automation platform.
