Code of Measuring Practice, 6th edition. The bases of value contained with the Code of Measuring Practice, 6th edition applies to all building classes except offices and residential buildings. However, the application of the professional statement contained within RICS property measurement, 2nd edition equally
applies to building classes. For offices and residential buildings RICS members and RICS-regulated firms should use IPMS and if IPMS is not used the reason for departure must be stated.

Code of Measuring Practice, 6th edition - rics.org
Purpose of the Code. The purpose of the Code is to provide succinct, precise definitions to permit the accurate measurement of buildings and land, the calculation of the sizes (areas and volumes) and the description or specification of land and buildings on a common and consistent basis. This may be required for
valuation, management, conveyancing, planning, taxation, sale, letting, or acquisition purposes.

RICS professional standards and guidance, Global Code of ...
The Code of Measuring Practice is a UK guidance note published by the Royal Institution of Chartered Surveyors . The RICS suggest that, ‘The purpose of the Code is to provide succinct, precise definitions to permit the accurate measurement of buildings and land , the calculation of the sizes (areas and volumes) and
the description or specification of land and buildings on a common and consistent basis.’

RICS code of measuring practice - Designing Buildings Wiki
RICS property measurement comprises the following two elements: 1. Professional statement: property measurement. Application of this professional statement. Technical definitions. IPMS: Office Buildings, as applied under the professional statement. IPMS: Residential Buildings as applied under the professional
statement (applies to office measurements and residential measurements only).
