The Stork and the Syringe argues that although doctors' approach to infertility is formed in response to the exigencies of the political economy of medical practice, it also accommodates a persistent gender bias: the tendency to regard women's bodies as inviting intervention and men's as demanding caution. This bias is manifest in relation to gametes (eggs and sperm), sex hormones, in the form of medical investigations and treatment, and

The Stork has many stories surrounding it, like in Aesop's (6th century BCE) fables The Farmer and the Stork and The Fox and the Stork. The first fable begins with a farmer plowing his fields, sowing his seeds and spreading his nets, these nets caught several cranes who hopped behind him picking up the seed.
