THE THEORY OF POINT ESTIMATION A point estimator uses the information available in a sample to obtain a single numberthatestimatesapopulatio nparameter.

Therecanbeavarietyofestimators of the same parameter that derive from di erent principles of estimation, and it is necessary to choose amongst them.

THE THEORY OF POINT ESTIMATION

A Story Point is a theoretical measure that expresses the difficulty level of any piece of work. The difficulty level is usually influenced by several factors such as the volume of work to do, the complexity of the work; any

risk or uncertainty in doing the work.
