Birkhäuser manuals, reference works, textbooks, and monographs are both highly practical and aesthetically designed products. They provide tools and inspiration for architects, designers, and students, covering international developments and actual projects by established studios on all continents.

[Birkhäuser](#) | [Designers & Books](#)

The manual is a very complete study of construction with wood. The book is worth every penny if you want to understand the assembly of a building with timber. The details of facades are extremely useful, is shame that almost all case studies are European (of course the book is from a German publisher; and they totally mastered the construction and techniques).
