Human tissue consists of cells within the body that are similar in appearance and have the same function. Donating tissue can dramatically improve the quality of life for others. As many as 50 people can be helped by the donation from one person.

Tissue donation - NHS Organ Donation  
08 October 2020. Strasbourg, France. Organ, tissue and cell transplantation is one of the great medical success stories of modern times. In many cases, it is the only life-saving treatment for patients with end-stage organ failure, devastating burn injuries or blood cancers, and in many others it can significantly improve the quality of life of patients, for example, by restoring their sight.
