[PDF] an introduction to general  
topology eBook

General topology has to do with,  
among other things, notions of  
convergence. Given a sequence  $x_n$  of  
points in a set  $X$ , convergence of  $x_n$  to

# Access Free To General Topology K D Joshi

a point  $x$  can be defined in different ways. One of the main ways is by a metric, or distance  $d$ , which is nonnegative and real-valued, with  $x_n \rightarrow x$  meaning  $d(x_n, x) \rightarrow 0$ . The usual metric for real numbers is  $d(x, y) = |x - y|$ .
