With it came a name change to 411LE. That engine was also used in the VW Porsche 914 and also the first 412 when it arrived in August 1972. In the latter application, 0-65mph could be reached in 15 seconds with an accompanying maximum speed of 96mph.

The Type 4 engine explained - Heritage Parts Centre

1. Are all type 4 engine cases identical? If so, why are "GA" cases preferable? 2. What practical difference is there between a 78.4 stroke crank and an 80mm crank--since the 80mm seems to be more prevalent and a little less expensive? 3. Which is the most preferable bore--94mm, 96mm or 103/4mm? 4.

Acces PDF Vw Type 4 Engine Timing The type IV engine's timing marks are on the BASE OF THE FAN. They are TDC, 5 degrees before TDC (static timing mark) and 27 degrees before TDC (dynamic timing mark). Now, the trick is, these timing marks are placed where they would be useful for a type IV Volkswagen, from which the engine is derived.
