Welding Cutting Volume Vol 2 Standard

This volume, like the others preceding it, is a voluntary effort by the members of the Welding Handbook Committee, The Welding Handbook Volume 2 Committee, and the Chapter Committees. An important contribution is the review of each chapter provided by AWS ' s Technical Activities Committee and other specialists. (ISBN 0-87171-729-8)

2 Air Products Welder™s Handbook Fusion welding The most widely used welding processes rely on fusion of the components at the joint line. In fusion welding, a heat source melts the metal to form a bridge between the components. Two widely used heat sources are: Gas flame The molten metal must be protected from the atmosphere - absorption of

## Welder™s Handbook

This paper make a detailed survey and research about the real situation about Chinese welding industry, and the future cooperation suggestion between Finland and China in this area. This topic was approached by searching for the latest and most accurate information through interviews, site visits, websites, books and promotional materials. The site visits are the most important.
