Most of us get at least two colds per year, but why? Viral infections that cause the common cold or flu can range from a nuisance to a serious health threat. According to the Centers for Disease...

~~Colds and flu: Why do they strike in winter?~~

When your body temperature rises because of an infection, it's called a fever. Fevers are caused by chemicals called pyrogens flowing in the bloodstream. Pyrogens make their way to the hypothalamus in the brain, which is in charge of regulating body temperature. When pyrogens bind to certain receptors in the hypothalamus, body temperature rises.

We are sick. Around the world, we struggle with diseases that were once considered rare. Cancer, heart disease, Alzheimer's disease, and diabetes affect millions each year; many people are also struggling with hypertension, weight gain, fatty liver, dementia, low testosterone, menstrual irregularities and infertility, and more.

~~Why We Get Sick Audiobook, written by Benjamin Bikman ...~~

We know that the whole creation has been groaning as in the pains of childbirth right up to the present time." God—the "one who subjected" the creation to frustration following the Fall—has a plan to eventually liberate creation from its bondage to sin, just as He liberates us from that bondage through Christ.

~~Is it sometimes God's will for believers to be sick ...~~

Getting a cold or flu can be sort of scary. But sometimes the more you know about something, the less scary it is! #education #science #elementary #learning-...
