Clear, engaging, and always friendly Maintaining their highly popular, user– friendly approach, Roy Yates and David Goodman demystify probability unlike any other text today. The authors help you develop an intuitive grasp of the principles of probability and stochastic processes, allowing you to successfully solve basic engineering problems using these principles... with a smile.

Since each of the 11 possible outcomes is equally likely, the probability of receiving a grade of i, for each i= $0;1;::::;10$ is $P[s i] = 1= 11$. The probability that the student gets an A is the probability that she gets a score of 9 or higher. That is $P[Grade of A] = P[9] + P[10] = 1= 11 + 1= 11 = 2= 11$: (2)
